Summary

Data Analyst and DevOps Support Engineer delivering reliable reporting and repeatable deployments for LMS operations. Build Power BI dashboards and SQL based datasets, automate recurring workflows using Python, and enforce data validation to improve metric consistency. Support CI/CD execution and cloud operations using Linux, Git, AWS, and Infrastructure as Code with Terraform. Comfortable with Docker, Jenkins, Kubernetes fundamentals, monitoring, and clear runbook documentation for stable releases.

Core Skills

- **Data Analytics:** SQL, Python, Data Cleaning, Data Validation, KPI Reporting
- **BI & Reporting:** Power BI, Excel, Google Sheets, Dashboard Development
- **Containers:** Docker, Jenkins, Kubernetes, Deployment Strategies
- **DevOps Fundamentals:** CI/CD, Linux, Git, GitHub, Release Support, Runbooks
- **Cloud & IaC:** AWS (EC2, S3, IAM, CloudWatch), Terraform, Ansible
- **Databases:** MySQL, PostgreSQL

Experience

Myra's Academy

August 2024 - Present

Data Analyst (DevOps Support Engineer)

Hyderabad, India

- Drive LMS analytics and DevOps support to improve reporting reliability and deployment execution.
- Analyze student and LMS datasets using Python, SQL, and Power BI to deliver actionable dashboards.
- Develop automation pipelines in Python and SQL, reducing manual reporting effort by 30%+.
- Assist CI/CD, monitoring, and provisioning using Linux, Git, and AWS services across workflows.

Myra's Academy

June 2024 - July 2024

LMS Intern

Hyderabad, India

- Supported LMS administration to maintain accurate student and course records for operations teams.
- Performed data validation and quality checks and supported basic data pipeline structuring.
- Assisted dashboard development, LMS maintenance, and operational reporting for stakeholders.

Projects

Modular IaC Framework for Multi-Cloud Deployment, Terraform

- Built reusable Terraform modules to provision cloud resources across AWS, Azure, and GCP.
- Configured remote state (S3, Azure Blob) and separated Development, Staging, and Production environments.

Microservices CI/CD with Jenkins and Kubernetes, Jenkins, Docker, K8s

- Developed Jenkins pipelines to build, test, and package microservices into Docker images.
- Deployed services to Kubernetes and applied rollout practices, including quality gates and blue-green.

Highly Available Cloud Platform using AWS & Terraform

- Designed a highly available AWS architecture to ensure fault tolerance and scalability.
- Provisioned VPC, subnets, ALB, EC2, and IAM using Terraform with remote state locking.
- Improved deployment safety and observability using CloudWatch alarms and cost controls.

Production-Grade CI/CD Pipeline with Jenkins, Docker & Kubernetes

- Built an end-to-end CI/CD pipeline to automate build, test, and Kubernetes deployments.
- Implemented Docker image versioning, rolling updates, and automated rollback strategies.
- Reduced deployment downtime to near zero with secure secrets and failure handling.

End-to-End Observability & Monitoring for Microservices

- Implemented Prometheus and Grafana to monitor Kubernetes-based microservices.
- Defined SLIs and SLOs for availability and latency across critical services.
- Improved incident response by designing actionable alerts and dashboards.

Education

Sphoorthy Engineering College, JNTU Hyderabad

August 2022

Bachelor of Technology in Electronics & Communication Engineering

Hyderabad, India

Certifications

- Data Science Certification, Geekster

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Working Proficiency (B1)
